

U.S. Shipments of Vinyl Siding and Soffit¹

The Vinyl Siding Institute, Inc. (VSI) sponsors a statistical reporting program. Vinyl siding manufacturers report U.S. shipments of vinyl siding and soffit in "number of squares," a unit of measure common in the building and construction industry. One square equals 100 square feet of siding, or enough to cover a 10-ft. x 10-ft. area.

Year	Number of Squares	Change
1986	12,397,916	----
1987	16,511,279	33.18%
1989	18,592,548	12.61%
1991	19,597,707	5.41% ²
1992	19,890,760	NC
1993	21,829,445	NC
1994	29,151,305	NC
1995	30,480,494	4.56%
1996	34,435,367	12.98%
1997	37,294,886	8.30%
1998	39,540,982	6.02% ³
1999	40,985,879	3.65%
2000	38,467,992	-6.14%
2001	38,250,066	-0.57%
2002	40,028,150	4.65%
2003	40,668,940	1.60%
2004	41,273,301	1.49%
2005	40,072,533	-2.91%
2006	34,436,399	NC [♦]
2007	31,561,825	NC [♦]
2008	24,385,655	-22.74%
2009	18,689,315	-23.36%
2010	18,408,881	-1.50%
2011	17,686,761	-3.92%
2012	18,046,849	2.04%
2013	17,815,590	-1.28%
2014	17,874,467	0.33%

NC = Not comparable

Footnotes:

- ¹ Reflects only companies reporting shipments to VSI, not the entire vinyl siding industry.
- ² 1991 includes industry estimates for non-participants.
- ³ Definitions refined for 1998 figures on.
- [♦] Percent changes are not included because participating manufacturers changed. The 2006 and 2007 numbers cannot be compared to previous years due to changes in manufacturer participation.
